MISSOULA--

Col. Carlyn L. Gilbertson, administrator of the State Division of Disaster and Emergency Services (DES) in Helena, will discuss the history and future of civil defense at 12:10 p.m. Friday in room 307 of the Botany Building at the University of Montana in Missoula.

Also speaking will be Lloyd Meyer, chief nuclear civil defense planner for DES. He will discuss civil defense as it applies to Montana--the threat faded and actions appropriate for Montanans. One of Meyer's responsibilities is crisis relocation planning, moving large numbers of people from "high risk" to "safe" areas in case of a 72-hour warning about a possible nuclear attack.

DES is a subdivision of the Department of Military Affairs. Gilbertson is a colonel in the National Guard.

Friday's lecture program is the eighth in the Botany Department's "Current Environmental Problems" series. Dr. Meyer Chessin, professor of botany, is coordinator for the series.
